Motivational Interviewing for Health and Human Services

Learn & Practice: MI for Human and Health Services

Motivational Interviewing has become an essential evidence-based approach for facilitating behavior change and improving client outcomes. This comprehensive program is designed to teach Motivational Interviewing concepts and practical skills, allowing you to put your learning into immediate practice. Lyssn's Motivational Interviewing for Health and Human Services Learn & Practice training module provides best-in-class instruction from Motivational Interviewing expert **Dr. Mary Hodorowicz** paired with immediate AI-powered feedback as users apply concepts and respond to realistic client scenarios.

The Expert Behind the Curriculum

Mary Hodorowicz

Ph.D, LSCW-C
she/ her

Dr. Mary Hodorowicz, LCSW-C, is a distinguished clinician and educator with extensive experience in social work, specializing in families and children. She received both her PhD and Master of Social Work (MSW) from the University of Maryland, School of Social Work, where she focused on Clinical Social Work with a secondary concentration in Management & Community Organization. She is a motivational interviewing subject matter expert and a member of the Motivational Interviewing Network of Trainers, highlighting her dedication to client-centered evidence-based practices. Mary also has subject matter expertise in crafting online simulations for teaching and training purposes, enhancing the learning experience for social work and other health science human service professionals. Mary has been an active clinician since 2007 and her clinical work is characterized by her compassionate approach and dedication to the well-being of families and children. Her multifaceted education and practical experience position her as a skilled teacher, trainer, and researcher.

LYSSN

WATCH, LEARN, AND PRACTICE WHENEVER, WHEREVER.

Through interactive modules, you'll explore key principles, receive prompt feedback, and develop a crucial skillset for Motivational Interviewing. The program begins with engaging through simple, complex, double-sided reflections along with explanations of why they are classified as the respective reflection type.

Learn From Experts

Each module begins with an introduction from an expert instrumental in successfully implementing motivational interviewing with clients.

Meet Your Clients

Our practice clients are paid actors simulating conversations your likely to encounter with real clients.

Learn and Review

Engaging content helps you learn new skills and review expert examples in practice.

Practice

You'll be given the opportunity to practice new skills by responding to client scenarios. You'll receive immediate feedback to help you see areas where you did well and those that could use improvement.

Lyssn's All-In-One Learning Platform

Lyssn intuitively and seamlessly guides caseworkers in practicing evidence-based techniques. Consistent practice and quick, actionable feedback help develop important skills while also supporting documentation and reporting.

Unlike traditional training methods which are time and cost prohibitive, Lyssn's Learn & Practice is a scalable training solution designed to help organizations meet accreditation requirements and individuals develop critical skill sets.

When you enroll, you also gain access to Lyssn's full Learn & Practice platform, including additional training modules such as Suicide Prevention, Multicultural Orientation, CBT Fundamentals, and expanded MI content.

Build on your team's existing MI skills:

MI for HHS Level 2
Continue building on foundational MI skills with advanced training designed for HHS environments. Level 2 expands core MI competencies through additional instruction, relevant simulated client scenarios, and immediate feedback to help learners strengthen and apply their skills in practice.

MI for Supervisors
Help supervisors translate MI skills into supervision, with practice using reflections and questions to support implementation across teams.

Raise the standard of practice to achieve
life-changing outcomes.
